

Leveraging Extreme Networks Technology for Unmatched, Global Results

Extreme Networks is a rapidly-growing business; we're adding new locations steadily around the globe, and are excited to launch several new, advanced network technologies. Our expansion required us to refresh our own network, so that Extreme employees can maintain superior service delivery for customers.

Business and Environmental Profile

27 Countries 41 Managed Locations	Five Network Managers	3,500+ Users	16,500+ Fixed Devices	2,300+ Mobile Devices	17,000+ Devices at Peak Usage

Challenges and Requirements

To keep pace with Extreme's rapid-growth and transformation the IT infrastructure needed to address all employee, customer, partner, and other stakeholder's needs. The deployment of Fabric Connect was especially necessary to optimize efficiencies while the company successfully launches new, innovative networking products. Network requirements include:

Enhanced Efficiency, Optimized Traffic Flows	Seamless Wi-Fi and Connectivity	Analytics Around Usage Trends	Fabric Implementation

The Solution

414 Switches 542 Wireless APs	Workflow Automation and Increased wEase of Use	Extreme Fabric Connect Deployment	ExtremeAnalytics and ExtremeControl integrated into Extreme Management Center	Simple and Flexible Network Design

The Results

25% Increase in Network Speed	121 TBs of Data Transferred Each Month	Installation Time 25% Configuration Time 50%	Takes 15 Mins to Join Three US Fabric Connect Networks	Network 100% Powered by Extreme Solutions	Zero Hardware Failures Post-Deployment
